

Nucoat is an excellent waterproofing Compound for cementitious water proofing Coatings.

I Advantages :

- Nucoat is a high performance Acrylic Polymer modified elastomeric Latex for cementitious water proofing Coatings.
- It performs as remarkable water proofing for concrete / masonry structures.
- It can be useful as bonding agent for new & old concrete / mortars with excellent bonding strength
- Admixture for high durable repairs. effective crackfiller by mixing with cement
- High Strength polymer grout for strengthening of structure.
- Non Toxic, non flammable, non cracking excel

II Areas of Applications :

Batchrooms, Ballconies, Roofslabs, Slopped Slabs, Swimmingpools, Water Tanks Sumps, Basements and Toilets

All water retaining structures

Excellent bonding agent for old to new concrete / Mortor.
Highly cementitious concrete / Mortor repairs
Superior performance Industrial flooring screeds etc.,
Excellent impact abrasion & Chemical resistant flooring U.V. Resistance.

Direction for use

Application

1. Surface Coating
2. For water proof / Anticarbonation
Coating Passivator Coat for
Steel Protection
3. Repair Mortors
4. Injection Grouting
5. Thin Bed Screeds / Patch Work

Mix Ratio proportion

- 1ltr Nucoat +200 ml Water + 1kg Cement
1ltr Nucoat + Protective 2kgs Cement + Required water
1ltr - 1.25 ltr Nucoat 5kgs Cement + 10 kgs Sand
Water as per requirement
1 ltr Nucoat + 2-3 kgs cement Required wate
2 ltr Nucoat + 5kg Cement + 8 kg Sand Water as per
requirement

Storage : It should be stored in cool & dryplace.

Caution : Use Glouses in hand and protect eye with goggles. Stir well before use.
